

BMGA Sprinklers Ltd. through its engineering team with over eight years of experience is a design engineering corporation specializing in fire protection engineering with extensive knowledge in [residential](#) and [commercial](#) automatic sprinkler systems and fire stand pipe systems.

The engineering team will provide efficient solutions for your design challenges. Our team will provide you with high quality engineering documentation containing 2D or [3D](#) sprinkler / fire stand pipe drawings, riser diagrams, floor plans and hydraulic calculations.

We are able to provide you with equipment brochures, shop drawings, coordination drawings, sleeving drawings and “AS BUILT” drawings. Our equipment brochures will include the most up to date supplier information available with emphasis on cost effectiveness. Our team is knowledgeable with the most recent [AutoCAD](#) and [Hydra CAD](#) software.

All our documentation is prepared by qualified designers utilizing software packages developed by *HYDRATEC INC.* known as being the best fire protection design software in the industry and reviewed by *professional engineers.*

The software package is a collection of applications (*Hydra CAD, Hydra Calc and Hydra List*) specific to the fire protection industry.

Our experience and design programs allow us to design, calculate and list your entire fire protection system while insuring the system cost friendly.
For our personal assistance please call **(905) 510-0865** or email to sales@bmgasprinklers.ca .

Yours sincerely

BMGA Sprinklers Ltd.
